Dear HR Manager

This letter is to express my interest in your posting on your It Firm for an Intern. With a Bachelor's degree in Computer Science and hands-on experience on Android and Laravel to create and implement software applications, I am confident I will be an asset to your organization.

I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of your organization.

Your listed requirements closely match my background and skills. A few I would like to highlight that would enable me to contribute to your bottom line are:

Skilled in designing, testing, and developing software.
Thorough understanding of data structures and algorithms and object-oriented programming.
Good analytical skill and critical case findings and fixing problems, 'I am a good googler'.
Knowledgeable of web and mobile development best practices.
Hands-on software troubleshooting experience.
Proven track record of proper documentation for future maintenance and upgrades.
Fast learner and hardworking and eager to learn.
Working with team and using version control.

I also have a certificate on Android App development from BITM.

I've done lot of freelance projects throughout the university life. Some of them are uploaded on my github repo. https://github.com/saaifuuu

I've attached a copy of my resume that details my projects and experience in software development. I can be reached anytime via my cell phone, 01521330148 or via email at kksaif05@gmail.com.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Sincerely,

Kazi Khaled Saif Ullah
